

MOSSAB MOHAMMED AL-HASSAN ALI

Systems Administrator | Windows Server & Active Directory Infrastructure

Riyadh, Saudi Arabia | +966 50 951 6097 | mossabal201@gmail.com | [linkedin.com/in/mossab-mohammed-al-hassan](https://www.linkedin.com/in/mossab-mohammed-al-hassan)

PROFESSIONAL SUMMARY

Systems Administrator with hands-on experience managing enterprise **Windows Server 2019/2022** infrastructure, **Active Directory Domain Services (AD DS)**, and physical/virtual server environments on **VMware**. Proven record delivering zero-downtime OS migrations, PowerShell automation, hardware lifecycle management, and backup & disaster recovery (DR) operations. Skilled in GPO deployment via GPMC, OU design, ADUC administration, authentication protocols (Kerberos/NTLM), and patch management to maintain highly available, secure infrastructure.

CORE SKILLS

Active Directory & Identity: AD DS administration, Domain Controllers, GPO design & deployment (GPMC), OU architecture & delegation, ADUC (user/computer/group provisioning), LDAP, Kerberos & NTLM authentication, MFA/SSO integration

Server Infrastructure: Physical & virtual server deployment (HP ProLiant), Windows Server 2012 R2 / 2019 / 2022 administration & migration, VMware virtualization, patch management (WSUS), hardware monitoring, resource optimization, server room build-out

Automation & Scripting: PowerShell scripting for administrative automation, credential recovery tooling, task scheduling

Backup, DR & Storage: Backup & disaster recovery (DR) planning, scheduled backups, recovery-point validation, RAID/storage administration, business continuity

Network & Security: DHCP, DNS, FTP, LAN design & troubleshooting, firewall administration, Cisco switch configuration & credential management, network backups

Platforms & Tools: Microsoft Office Suite, CCTV/surveillance systems integration

PROFESSIONAL EXPERIENCE

Systems & Network Engineer — Gulf Digi Systems

Mar 2025 – Jul 2026

- Led enterprise OS migration from **Windows Server 2012 R2 to Windows Server 2019**, and upgraded core infrastructure to **Windows Server 2022**, preserving 100% application compatibility while hardening AD DS security posture.
- Administer **AD DS** environment end-to-end — provisioning users/computers via **ADUC**, structuring **Organizational Units (OUs)**, deploying **Group Policy Objects (GPOs)** through **GPMC**, and maintaining Domain Controllers to enforce domain-wide security and access policy.
- Manage physical and virtual server infrastructure spanning **HP ProLiant** hardware and **VMware** virtualization, resolving BIOS-level credential lockouts and access failures with **zero unplanned downtime**.
- Automated Cisco switch credential recovery using a custom **PowerShell** script, cutting manual admin overhead while reinforcing Kerberos/NTLM-based network access-control protocols.
- Own **backup and disaster recovery (DR)** operations for production servers — scheduled backups, recovery-point validation, and restore testing — safeguarding business continuity.
- Directed end-to-end **server room deployment** — network device installation, cabling, and CCTV integration — establishing high-availability physical infrastructure standards.
- Diagnose and resolve OS-level performance bottlenecks and system errors, sustaining a stable, scalable server environment for business-critical operations.

EDUCATION

Bachelor of Information Technology — East Nile College, Khartoum, Sudan (2017)

CERTIFICATIONS

- Computer Networks Design & Administration — Study Communications Academy, Khartoum (2017)
- British Cultural Centre — Computer Science Diploma, Khartoum (2007)
- CCTV Systems — Graduate Training Centre, Khartoum (2018)
